

Skill Development

Pawan Hans has established two National Institutes under skill India Initiatives i.e. PHTI (Pawan Hans Training Institute) and NIASS (National Institute of Aviation Safety & Services). To further take forward Skill India Initiatives in Helicopter Industry, Pawan Hans has constructed Nations first Heliport at Rohini in New Delhi. This Heliport will be a one-point solution for public passenger services, MRO and **skill development centre** for training of pilots, AMEs & technicians.

National Institute of Aviation Safety and Services is an initiative of Pawan Hans Limited. The Institute is a knowledge bank and provides services to helicopter operators in general aviation, owners and other organizations on aviation safety related issues and assists the Government and regulating agencies in formulating/implementing rules and regulations for smooth operation, maintenance of helicopters/aircrafts and development of heliports, maintenance facilities in the country.

All faculties of the institute are experienced experts from flying, maintenance, audit, safety and quality assurance to keep our commitment to establish state of the art training facility characterized by a high degree of persistence, understanding and ability to visualize the future challenges of general aviation industry.

The training courses conducted by the institute address the core competencies of flying crew and maintenance personnel and provide knowledgeable aviation professionals to the industry to enable them perform efficiently and safely.

PHTI (Pawan Hans Training Institute)

The aviation industry has evolved into a global highly technical field where the expertise and proficiency of its workforce are critical to the safety of millions of people that fly every day. Newcomers to the field may now demonstrate their knowledge via PHTI. This visionary new training program establishes a broad system of technical career paths that quantify knowledge at many level from DGCA aircraft maintenance engineer examinations at a preparatory level. These certifications are the starting points for those aspiring professionals who wish to document their commitment to quality with the validation that aircraft certification brings.
